NHMRC e-ASIA 2022 Joint Research Program applications recommended for funding commencing in 2023

About the Scheme

The NHMRC e-ASIA Joint Research Program (JRP) supports Australian participation and partnership in international collaborative research through the e-ASIA Joint Research Program. The e-ASIA Joint Research Program supports international joint research projects in the East Asia region on a multilateral basis and promotes the interaction of researchers through scientific workshops. Fields of cooperation are decided among the e-ASIA participating member organisations and funding is for up to three years.

International collaborative research projects are selected through an open call for proposals. The field of cooperation for this funding call was infectious diseases (including antimicrobial resistance). Applications must be supported by a minimum of three member organisations to be successful.

The applications listed in the table below have been approved for funding to commence in 2023. They are listed in application identification number (App ID) order.

App ID	Chief Investigator Name(s)	Application Title	Administering Institution	Budget
2018589	CIA - Prof Jian Li CIB - Assoc Prof Fanfan Zhou CIC - Dr Xukai Jiang	Development of Innovative Antimicrobials for Combatting Multidrug-resistant Gram-negative Bacteria: An integrated multi-disciplinary approach	Monash University	\$749,920.00
2018677	CIA - Prof Katryn Stacey CIB - Dr Helle Bielefeldt-Ohmann CIC - Dr Adriana Pliego Zamora CID - Mr Jaehyeon Kim CIE - Prof Benjamin Schulz	Gut leak and microbiome contribution to severe dengue disease	The University of Queensland	\$669,503.00
2018695	CIA - Dr Rhea Longley CIB - Prof Ivo Mueller	Applying novel serological exposure markers to quantify residual malaria transmission in the Philippines	The Walter and Eliza Hall Institute of Medical Research	\$361,876.50
			TOTAL	\$1,781,299.50
